
JOB DESCRIPTION

Role: Intermediate to Senior Front End Developer
Location: Wellington, New Zealand

Spotlight Reporting is a truly transformational company at the forefront of the exciting and evolving cloud-based software industry. It has exploded onto the market with software that offers advanced reporting, forecasting, and business intelligence to financial advisors, accountants and organisations across the globe.

With offices in Australia, New Zealand, the UK and the US, this award-winning business is looking for a Product Designer in Wellington that has true passion for helping and transforming business outcomes through technology and a desire to get the most out of people.

Position Summary

We're looking for a **Front End Developer** - someone strong in React and Javascript to join a small, front-end focused team.

Within a React, TypeScript environment you will be responsible for modernising the code, developing new features and fixing bugs. You should have an enthusiasm for delivering high quality, maintainable frontend code that follows best practices, considers accessibility and is highly tested (i.e. using Jest and React Testing Library).

Spotlight Reporting is an exciting phase in which we are actively rebuilding many portions of our application. This is in addition to the regular, day-to-day work of keeping our existing platform healthy / bug free and continuing to deliver new functionality.

Any experience with .NET, AWS, GitHub and Jira would be a plus.

Daily Responsibilities

- Writing clean and healthy code using React, Typescript, HTML and CSS
- Working with the Product Owners and Product Manager in scoping and planning projects
- Working closely with your team members to release changes iteratively and rapidly
- Provide guidance and collaboration for web design and development to improve the front-end of our web platform, ensuring that it is properly architected and specified
- Collaborate with business, technical and management teams on front-end design, UX and UI, and front-end development
- Champion and adhere to best practices in front-end development, sharing and transferring knowledge and practice as part of a progressive web team
- Push our front-end development focusing on ReactJS, Typescript, Javascript ES6, HTML5, Unit testing and related technologies
- Actively use and maintain JIRA software development tools and the Web team wiki to manage workloads and deliver projects across their full lifecycle
- Moving quickly to deal with any emergent issues on the live site
- Research, recommend and implement best practice approaches for how we code and work
- Bringing your own ideas and suggestions to enhance, improve and generally make our app awesome
- Going the extra mile to do things right – no quick and dirty hacks here, just good solid code!

Skills and Qualifications

- Experience with React and Javascript
- Bonus: Experience with TypeScript
- Bonus: any experience with the cloud, especially AWS
- Self-motivation and pragmatism – you love working in a fast-paced environment and understand how to balance competing priorities and understand the benefits of delivering value to end users in an iterative manner
- Excellent communication skills – you will be able to clearly present your ideas and rationale from a remote work setting
- Experience with Git
- Knowledge of OWASP security principles
- You must hold a genuine desire to learn fast, work with a talented team but also contribute to our customer's first ways of working.

Please submit both your Cover Letter and CV to ben.chartrand@spotlightreporting.com
