
JOB DESCRIPTION

Role: Senior Product Designer
Location: Wellington, New Zealand

Spotlight Reporting is a truly transformational company at the forefront of the exciting and evolving cloud-based software industry. It has exploded onto the market with software that offers advanced reporting, forecasting, and business intelligence to financial advisors, accountants and organisations across the globe.

With offices in Australia, New Zealand, the UK and the US, this award-winning business is looking for a Product Designer in Wellington that has true passion for helping and transforming business outcomes through design.

Position Summary:

We are looking for a **Senior Product Designer** experienced in designing and delivering end to end user experiences for SaaS applications.

You will be responsible for gathering user requirements, developing user journeys, wireframes, interactive hi res prototypes. You will be collaborating with the product team and other internal stakeholders as well as collecting user research to take complex functionality and turning them into effective user journeys.

To be successful in this role, you should have at least 4+ years experience in designing software applications, especially cloud based SaaS systems.

You'll be a direct report into the CTO, with a dotted line to our Product team leads and Creative Director. Your responsibilities and the requirements of the role will include:

- Design end-to-end user experiences through user research, team collaboration, developing user journeys, wireframes, interactive prototypes, and hi res visual prototypes using Figma
- Design complex navigation flows. You will need to take functional requirements and turn them into effective user journeys
- Act as a strategic partner to Product Managers to break down complex, ambiguous problems into sophisticated solutions
- Partner closely with our front end developers to establish a design system and components library so everyone can converse and develop in the same visual language

- Seek opportunities to enhance and standardise the user experience for our suite of products
- Reflect, gather feedback on and quickly iterate on to design user flows for new features based on real world usage insights
- Encourage and guide your teammates by serving as the UX / UI design expert within the product team to deliver designs at the highest quality
- Manage and improve the design process, design system and other documentation that will aid in the long term scalability of the design team

Why apply for this role and work for Spotlight Reporting?

- Work at the forefront of the cloud-based revolution
- This role is perfect to build on your career in Product Design
- We're a company that aims to cultivate talent and growth, with many opportunities for upward mobility.
- Great office location (Wellington, NZ)
- Flexible working arrangements
- Be part of a motivated and talented tight-knit team that is transforming the way business is conducted across the globe
- Accelerated opportunity to grow as a team but also individually
- A friendly and open culture where your initiative and ideas are appreciated and valued.

Please submit both your CV and your Portfolio to ben.chartrand@spotlightreporting.com
